

Elder-aan

↳ App to help teach elders how to use their smartphone.

↳ Basic ~~pre~~ premise → Reinforcement learning.

- orange / light orange: bg
- light / rich green: correct
- light red: incorrect
- every 'app' has own colour set

↳ giving clear indication on what is correct and what is not.

↳ Use colour to show correct / incorrect

↳ Don't even show incorrect gestures

↳ Be very specific with the instructions (finger on screen and).

Home / opening screen. + Setup.
